

INDIA DRY GIN

GOA INDIA

From the fragrant Tulsi leaf used in Ayurveda to the wildly aromatic Chamomile flower, each botanical has a story to tell. The heart and soul of our “India Dry Gin” is wild Juniper, foraged from the Himalayas. Copper Pot distilled in Goa, Jin Jiji is the essence of India.

BOTANICALS

Himalayan Juniper, Bulgarian Juniper, Coriander Seed, Black Tea, Angelica Root, Orris Root, Cashew Nut, Tulsi, Chamomile

ALCOHOL

43.0% ABV

VOLUME

750 ML

STYLE

DRY GIN

JIN JIJI

We set out on an expedition around India to source for a gin that truly depicts the rich and diverse botanicals found in this magical country. The heart and soul of our “India Dry Gin” is wild Juniper, foraged in the extremity of the Himalayas. We couldn’t resist adding Tulsi, a fragrant leaf used in Indian Ayurveda and often regarded by Hindus as the earthly manifestation of goddess Tulsi. We distill our botanicals in a little distillery in Goa, throwing into the pot some of the highest grade, locally grown cashew nut – thriving here since being introduced by Portuguese rulers in the seventeenth century.
