

## KANOSUKE SINGLE MALT LIMITED EDITION 2023

KAGOSHIMA, JAPAN

The Kanosuke Single Malt Limited Edition 2023 expands on the distillery's landmark style with this heavily peated expression. Using a similar vatting of barrels to mature peated malt distilled between 2018 and 2019, this whisky was bottled in 2023 at cask strength. Robust notes of cinnamon, pastry custard, and banana are all present in the nose as well as a delicate smokey incense. The palate is weighty and long with a huge dose of black tea, salted caramel, and baking spice that yields to a dry finish full of salty-sweet smokey goodness.

ALCOHOL

**59% CASK STRENGTH**

**NAS**

AVERAGE AGE OF WHISKY

**4-5 YEARS**

## THE KANOSUKE DISTILLERY

The Kanosuke Distillery went into operation in 2018 and is named after the 2nd generation leader of the company, Kanosuke Komasa. The distillery is located on a 9,000 square meter tract of land along Fukiagehama Beach on the west coast of Kagoshima Prefecture. The two-story distillery house features 3 unique pot stills, compared to the typical 2 pot stills commonly found in similarly small distilleries. Each of the three pot stills has a different neck shape and lyne arm angle which yield uniquely flavorful distillates to create the Kanosuke profile.
