

MARS TSUNUKI: PEATED

NAGANO, JAPAN

This second single malt release from the newly reopened Mars Tsunuki Distillery brings forward a subtle peatiness that was hidden in The First. Water from Mt. Kurata brings a soft & delicate yet heavy water to the distillery that is perfectly reflected in the mouthfeel.

TASTING NOTES

Hints of peated honey on the nose are followed by crisp green apple, fresh mint & buttered banana on the palate. A sweet & smokey yellow fruit notes linger long after.

MARS DISTILLERY

Mars Whisky is located between Japan's soaring Southern Alps and the towering Central Alps. The Hombo family have been distilling for more than a century and added whisky to their repertoire in 1949. At that time the distillery was located in the Tsunuki region of Kagoshima Prefecture on the southern-most island of Kyushu.

Until 1984, it was the southernmost whisky made in Japan, which ended when the Hombo clan moved the distillery to the idyllic alpine setting of Miyada village in southern Nagano Prefecture, Central Japan. They chose this site for its cool temperature, which slowed maturation, and the plentiful soft granite filtered snowmelt fed aquifers.
